

# UNITED HYDRO VESTA COMPRESSOR OIL

## Product Description:

United Hydro Vesta Compressor Oils are hydro-treated based fluids designed for use in air compressors and high temperature circulating systems where freedom from deposit formation is desired. Formulated from highly refined hydrocracked base stocks, United Hydro Vesta Compressor Oils is resistant to oxidation, thereby minimizing the formation of acidic oxidation products that can lead to system corrosion and reduced oil life. The naturally high viscosity index of the base fluid provides stable viscosity characteristics and maintaining a tough fluid film, even at high operating temperatures.

United Hydro Vesta Compressor Oil, incorporating the latest technology, will allow the oils drain interval up to 6000 hours with normal operating temperature. In more severe application, it will provides up to 800 hours with operating temperature above 100°C. This has been proven in a wide range of compressor types, operating under harsh conditions. United Hydro Vesta Compressor Oils extended 1 to 2 times longer than ordinary compressor oil life.
