

UNITED GLYCOL RADIATOR COOLANT

Product Description:

United Glycol Radiator Coolant is a premium quality, single-phase, ethylene glycol based product. This product provides excellent heat rejecting aluminum protection for all automotive and light duty diesel applications. It also provides outstanding protection for heavy-duty diesel applications when combined with supplemental coolant additives. United Glycol Radiator Coolant protects all common cooling system metals including solder, copper, brass, steel, cast iron and aluminum. This formulation is compatible with all other major brands of coolant and will not affect automotive hoses and gaskets.

United Glycol Radiator Coolant is recommended for automotive and trucks cooling systems. It contains an effective defoamer to prevent foaming in the cooling system for the life of coolant.

United Glycol Radiator Coolant is recommended for use in all automobiles requiring ethylene glycol based coolant.

Applications / Benefits:

- ▣ High quality coolant designed for use in all types of radiator cooling systems.
- ▣ Provides excellent heat rejecting properties.
- ▣ Protects cooling systems under high temperature conditions.
- ▣ Be used directly without re-watered.
- ▣ Ready to use

Typical Characteristics:

Test Description	Method	
Specific Gravity @ 15 °C	ASTM D 4052	1.014
Freezing Point, °C	ASTM D 1177	-6
Boiling Point, °C	ASTM D 1120	102
Appearance	Visual	Green
